

DROWSY BOT COMMAND REFERENCE

Commands only: what each bot command does.

This PDF covers the bot commands users and staff can run in Discord. Slash commands use the / menu. Legacy text commands begin with !. Staff-only commands require a staff role in the server.

How To Read This

- **Public** commands can be used by regular members.
- **Staff Only** commands are limited to moderators or event staff.
- Queue commands control live stage or open-mic sessions.
- Ad and invite tools support overlays and moderation.

Included Sections

Stage queue

Announcements

Advertisements

Invite moderation

Legacy text commands

Slash Commands

Discord app commands

/events PUBLIC

Posts links for live and upcoming Discord scheduled events in the server.

/queue PUBLIC

Shows the current lineup and active stage status for the server.

/announce STAFF ONLY

Sends an announcement through the bot to the current channel or another selected text channel. Options: message, optional title, optional color, optional target channel.

/announce-color STAFF ONLY

Sets, checks, or clears the default embed color used for announcements in that server. Options: color and optional reset flag.

/start-queue STAFF ONLY

Starts queue tracking for the voice or stage channel the staff member is currently in and posts the control panel.

/open-queue STAFF ONLY

Reopens the active queue so new people can join the lineup again.

/close-queue STAFF ONLY

Closes the active queue to new joiners without ending the current event.

/next STAFF ONLY

Moves the session forward to the next performer in the queue.

/radio STAFF ONLY

Starts or stops the intermission radio used between performers.

/stop-queue STAFF ONLY

Ends the active event, closes the session, and posts event stats when available.

/ad-upload STAFF ONLY

Uploads a new image ad for the OBS overlay and makes it the active ad.
Options: required image attachment, optional title.

/ad-list STAFF ONLY

Lists the uploaded ads so staff can see their ad numbers and current order.

/ad-show STAFF ONLY

Switches the active overlay ad to a specific uploaded ad by its list number.
Option: index from the ad list.

/ad-rotate STAFF ONLY

Turns on automatic ad rotation for the OBS overlay.
Option: seconds between changes.

/ad-rotate-stop STAFF ONLY

Turns off automatic ad rotation and leaves the current ad in place.

/ad-remove STAFF ONLY

Deletes an uploaded ad image by its list number.
Option: index from the ad list.

/allow-invites STAFF ONLY

Lets a specific user or bot post Discord invite links without being moderated.
Option: target user or bot.

/revoke-invites STAFF ONLY

Removes invite-link permission from a user or bot on the allowlist.
Option: target user or bot.

/purge-invites STAFF ONLY

Scans text channels and deletes unauthorized Discord invite links.
Option: messages per channel to scan.

Legacy Text Commands

Message commands that begin with !

!queue !q PUBLIC

Replies with the current queue embed for the active stage.

!queuejoin !qj PUBLIC

Joins the active lineup if the queue is open and the member is in the required voice channel.

!queueleave !ql PUBLIC

Leaves the current queue. If the current performer leaves, the queue advances forward.

!queuenext !qn STAFF ONLY

Advances to the next performer using the message-command version of the queue controls.

!addqueue !aq STAFF ONLY**!stagestart !ss** STAFF ONLY

Adds a user to the lineup by mention, user ID, exact username, or exact display name.

Starts tracking a Discord stage channel the staff member is already connected to.

!stageend !se **STAFF ONLY**

Stops stage tracking that was started with the legacy text command flow.

Notes

Important behavior

- Queue commands only work when there is an active tracked stage or voice session.
- Some commands return private staff replies instead of public messages.
- Advertisement commands affect the OBS/browser overlay assets used by the bot.
- Invite moderation commands manage an allowlist and cleanup unauthorized invite links.

Export note: open this file in a browser and print to PDF with background graphics enabled. The layout is sized for A4 output and focuses only on bot commands.
